(a) East (b) West (c) North (d) South (e) None of these

Q7. Facing the east, Robert left and walked 20 meters, then turned to his left again and walked 20 meters. He then turned 45° towards his left and went straight to cover 40 meters. In which direction is he from his starting point?

(a) South-West (b) South-East (c) North-West (d) North-East (e) None of these

Vicky starts from his house and heads for the college which is 400 meters west of his house, when he covers half the distance; he changes his mind and turns right. What distance should he travel now, so that his sister would think that he is in the college itself? Assume that

1. his sister can see him with a telescope
2. his sister has no sense of direction
3. his sister knows that the distance between his house and the college is 400 meters

(a) 200 $\sqrt{2}$ m (b) 200 m (c) 200 $\sqrt{3}$ (d) 400 m (e) None of these

Directions (Q8-10): Manoj started from his house, went 1 km south, turned left, went 1 km, turned right went 1 km and again turned right and went 2 km. He saw his friend Rajesh coming from the opposite direction. Rajesh started from his house, went 2 km south, then turned left and went 1 km where she meets her friend Manoj, who was coming from the opposite direction. Both meets exactly at 9:30 a.m.

Q8. How far is Rajesh's house from Manoj's house?

- (a) 1 km east (b) 3 km east (c) 2 km west (d) 1 km south (e) None of these

Q9. If Manoj walks at 6 km per hour, at what time did he start from his home?

- (a) 8:30 a.m. (b) 8:40 a.m. (c) 8:50 a.m. (d) 9:00 a.m. (e) None of these

Q10. If both started at the same time, what approximately is the speed of Rajesh?

- (a) 4.2 km/hr. (b) 3.6 km/hr. (c) 2 km/hr. (d) 4 km/hr. (e) None of these

Q11. Raman starts from his bank and goes 2 km east, turns right and goes 2 km, then turns left and goes 2 km and finally again turns left and after 2 km reaches his house. How far is his house from bank?

- (a) 2 km (b) $\sqrt{5}$ km (c) 4 km (d) 3 km (e) None of these

Q12. Sunita drives 3 km north from her house, turns left and drives 5 km, again turns left and drives 3 km. Finally, again turns left and drives 1 km and reaches here office. In which direction is her office from his house?

- (a) East (b) South-West (c) West (d) North –East (e) None of these

Q13. Ranjit walks 1000 meters towards north. From there, he walks 600 meters towards south. Then he walks 300 meters towards east. How far and in which direction is he with reference to his starting point?

- (a) 5000 meters towards west (b) 700 meters towards west (c) 700 meters towards east
(d) 500 meters towards north-east (e) None of these

Q14. Kmabli walks 40 metre north and reaches his bank. He walks back to where he was and continuing in the same direction goes for another 60 metre, then turns left and walks 40 metre, turns right and walks another 20 metre. He now reaches his house. How far is his house from the bank and in which direction?

- (a) $40\sqrt{10}$ m S-W (b) $40\sqrt{5}$ m. S-E (c) $40\sqrt{10}$ m. S-E (d) $40\sqrt{5}$ m S-W (e) None of these

Q15. A man is facing north. He turns 45° towards his right, then turns left and finally towards his right at an angle of 135° . In which direction is he facing now?

- (a) North (b) North-East (c) East (d) North-West (e) None of these

Q16. If north-west is called 'west', 'south-west' is called 'south', 'south-east' is called 'east' and so on, what direction will north' be called?

- (a) East (b) North-West (c) North-East (d) South (e) None of these
